**MobileViewpoint**

Clipper

LIVE CLIPPING AND RE-PUBLISH KEY MOMENTS

Real-time clipping tool

Web-based

Easy to use interface

Integrated part
of the LinkMatrix

Description

With Mobile Viewpoint's web-based live TV clipping application, Clipper, content teams can select key moments as they occur from a live stream and edit and post them within 30 seconds on Social Media platforms or a private CDN. Real-time, fast and in the highest quality. And no extra hardware needed!

MobileViewpoint

With Clipper there is no need for complicated editing systems anymore. Just access the Clipper application through the LinkMatrix portal, select your live stream, select highlights, edit them frame accurately and post them instantly.
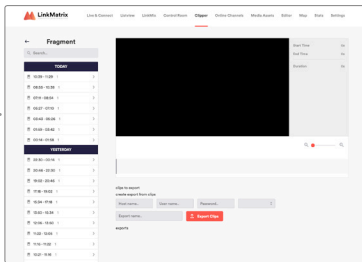

ADVANTAGES

- Real-time
- Web-based
- Integrated part of the LinkMatrix portal
- Easy to use user interface based on scene recognition and frame accurately editing
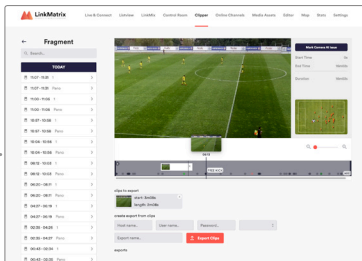

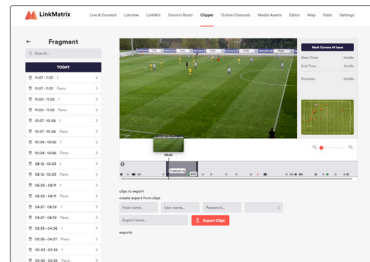

BENEFITS

- Be the first to share content on social media channels
- Engage bigger and new audiences with your short format content
- Re-use key moments after the actual event

Select content by date and time

Select a moment (Clipper automatically detects highlights)
